

Course: „K-TAPING SPEECH AND LANGUAGE THERAPY”

September 30 - October 1st 2017

Theory: Basic principles of the K-Taping therapy. The 4 taping techniques, anatomy, applying the basic taping techniques, combination rules for specific indications, Cross-Taping, basic rules for lymphatic correction taping techniques.

Practice: The application of K-Taping therapy in speech and language therapy for a large number of medical conditions using muscle, ligament, corrective and fascia correction taping techniques as well as a selection of lymphatic correction taping techniques.

The following taping techniques will be taught, amongst others: abdominal muscles, paravertebral muscles, multifidi, pectoralis major / minor, scalenus anterior / posterior, serratus muscles, sternocleidomastoid, frontal sinus, zygomatic bone, treatment of scars, hypersalivation, temporomandibular dysfunction, stabilisation of the lower jaw, trigeminal neuralgia, facial nerve paralysis, drainage of the face.

During the course, participants will be introduced to treatment of the head using the "12 energies" therapy. The meridian treatment, 12 energies, revitalises the tissue and relaxes the nervous system.

WHO SHOULD ATTEND?

Speech and Language Therapists and health professionals specializing in Speech Therapy.
